Average Grade of the Student's Record

The average grade of the student's record is 9.15 according to the stipulations of Royal Decree 1125/2003. The average grade of the academic record is the sum of the credits obtained by the student, the credits earned and recognized. Each one is multiplied by the value of the numerical grade following the scale from 0 to 10, and divided by the number of total credits obtained by the student. The credits obtained by recognition of credits corresponding to educational activities not integrated in the study plan will not receive a numerical grade and will not be taken into account in the average grade.

"Units of Permanency" used up by the student as of this date according to the regulations of the University of Salamanca (Official Bulletin of Castile & Leon, 1st Dec., 2009): 8
